

Press release

Partners for Life

Québec, January 28th, 2010 – The Canadian Transplant Games' 5th Edition will take place in Québec City from August 9th to August 14th, 2010. MC2, which is a not-for-profit organization, has received from the Canadian Transplant Association the mandate of organizing this event, which will pace the summer season in Québec City.

This competition is fuelled by generosity and involvement, not only from volunteers and professionals, but also from its partners. MC2 is glad and proud to announce two important financial partners that have joined the 5th Canadian Transplant Games' organization. The first is the Mouvement des caisses Desjardins, which is an important player in the province of Québec when it comes to cooperation and social involvement. It has not hesitated to become one of the Games' principal partners. They will know how to make the most of their organization to raise awareness among population about organ and tissue transplants. The same goes for the City of Québec, which demonstrated a constant involvement in the cause by also becoming a Gold partner in our event.

A partner does not have to be financial. Four people have given us the honor of being the flag bearers for the Games. Here are their names: Dr Bernard Cantin, cardiologist and medical director for the cardiac transplant program in the Institut universitaire de cardiologie et de pneumologie de Québec, honorary president of the Canadian Transplant Games in Québec. Doctor Pierre Marsolais, internist and intensivist at the Hôpital du Sacré-Coeur of Montréal, honorary president of the Canadian Transplant Games in Montréal. Ms. Micheline Cyr Asselin, CEO of the Home of transplant patients of Québec and spokesperson for the Games in Montreal. Mr. Jean-François Labrie, host at the 93.3 radio station and spokesperson for the Games in Québec.

The organizational committee will work toward a precise goal in mind: to raise the number of signed cards for organ and tissue donation in Canada.

About MC2

MC2 is a not-for-profit organization, which is specialized in project management. For the last 10 years, this company has been letting the student relief acquire professional experience in a multicultural and multidisciplinary environment through concrete and enriching mandates.
